

# WebTerm™

## Web-to-Host Host Access

powerlan  
connectivity

Powerlan makes it easy for organizations and corporations to front-end today's mission critical applications and corporate data with WebTerm™. Available for Microsoft® Windows® platforms, WebTerm is reliable, fast, and easy-to-deploy terminal emulation solution that is highly customizable.

WebTerm provides a good experience for both end-users and system administrators alike. WebTerm comes with a fully integrated security client, TunnelMate, providing the added benefit of delivering terminal emulation over secure SSL and Secure Shell connections.

### Key benefits for your company

- Deploy, customize, and automate, for the entire enterprise from one location, all within minutes
- Completely stand-alone and Native, no host components required
- Supports popular releases of Microsoft Internet Explorer® and Netscape® Navigator
- Installs transparently “on the fly” from a Web server via CAB or JAR installer files

Deploy highly customizable, “front-end” Web-to-host connectivity corporate wide, all within minutes, securely, with Powerlan's WebTerm and TunnelMate clients.

### Why You should Buy WebTerm

- Integrated Secure Shell & SSL security client, TunnelMate™ provides secure connections for your critical data protection
- WebTerm allows you to connect to host applications as embedded terminal windows, or full screen windows in popular browsers
- Toolbar & Keyboard Macro support for creating robust macros for both Mac® and Microsoft® Windows® users
- Connects your end users to IBM mainframes and mid-ranges, COMPAQ VMS®, and UNIX systems seamlessly and easily
- Provides a wide variety of front-ending and automation features
- Current connections remain active while browsing to other pages
- Keyboard Re-mapping and Control Key re-mapping
- International keyboard support and mapping
- Local and network printing support
- Run secure multiple sessions simultaneously from one WTS session settings file

POWERLAN

## System Requirements

- Operating Systems: Microsoft Windows 95, 98, NT4.0, 2000, XP
- Disk space: Approximately 2 MB (Administration program additional 5 MB)
- RAM: 16 MB minimum (32 MB recommended)
- Network: TCO/IP WinSock for Microsoft Windows
- Netscape Communicator or Microsoft Internet Explorer 4.0 or later

## Secure Connectivity

- Seamlessly integrated with Powerlan's TunnelMate Secure Shell software
- Runs transparently - no second terminal application needed!
- Secure encryption of all connections
- Supports Secure Shell protocol versions 1 and 2

## Easy to use tools to customize and automate for end users

- Built-in Macro Toolbar allows user-friendly access to terminal features
- Completely "Front-End" your legacy Applications!
- Key-based automation with keyboard Macros
- Full JavaScript and VBScript scripting support
- Interoperability via LiveConnect and ActiveX

## IBM Mainframe

- TN3270 and TN3270E
- Terminal modes emulated: 3278 models 1 through 5 & 3279 models 2 and 3
- TTY mode
- Status bar
- Cursor position
- 3287 and 3270E Support (RFC2355) Printing and Print Screen support

## IBM Mid-range

- TN5250 and TN5250E
- Emulation: 3477-FC & FG, 3180-2, 3179-2, 3196-A1, 5292-2, 5291-1 & 11
- TTY Mode
- ASCII and EBCDIC keyboards supported
- 3812 and 5250E Printing and Print Screen support

## Unix and COMPAQ VMS

- Terminal modes emulated: VT420, VT320, VT220, VT100, VT52
- Printing support: AutoPrint, Passthrough and Print Screen
- Host-writable status line
- Programmable function keys
